Evan Winter Software Engineer

Chicago, IL 60614   (612) 281-7554   evan@evanwinter.me   https://evanwinter.dev

Experience

Schafer Condon Carter
Junior Software Engineer
Nov 2018 – Feb 2020

Contributed to full-stack development of 17 web properties consisting of a variety of tech stacks and platforms including Gatsby (React/JavaScript), Wagtail (Python/Django), Magento 2 (PHP), and Adobe Experience Manager (Java/HTL).

Created the agency's first progressive web app; an offline-first, survey and lead-generation app built with Gatsby.

Created technical documentation for internal tools and processes, and client-facing documentation for client-owned tasks.

Schafer Condon Carter
Developer Intern
Jun 2018 – Nov 2018

Performed front-end development of the agency's website redesign, translating Sketch designs and prototypes to a fully-authorable custom site built with Django, SCSS, and JavaScript.

Created sitemaps, wireframes and high-fidelity prototypes using Sketch, UXPin, Framer, and vanilla HTML, CSS, and JavaScript.

Regularly assisted in bug resolution, troubleshooting and routine maintenance tasks.

Information Tech Solutions
Developer
Mar 2016 – May 2018

Created responsive email templates using HTML and CSS.

Created, maintain and customize complex JIRA project configurations including workflows, custom fields, permissions and notifications.

Wrote Groovy scripts to automate repetitive or UI-intensive processes.

Freelance
Web Developer
Aug 2017 – Present

Worked with clients to design, develop and maintain a product that fit their needs.

Created static websites with vanilla HTML, CSS and JavaScript, as well as headless CMS-based JAMstack sites with Gatsby (React), Contentful and Netlify.

Projects

Visually
Design, development
Ongoing

Web app for data visualization and statistical analysis of song lyrics. Built with JavaScript, React, Redux, Nivo, SCSS, and the Genius.com REST API.

https://visually.netlify.com

Creative Portfolio
Development
Mar 2019

A creative portfolio site built on the JAMstack: a Gatsby (React) front-end with data sourced from Contentful, hosted and continuously deployed with Netlify webhooks.

Schafer Condon Carter
Front-end development
Jun 2018

A website built to represent the agency and its offerings, for which I did the majority of the front-end development. Built for Wagtail CMS with Django, SCSS and JavaScript.
